* For DRE VPAT systems, paper records reported as "lost or destroyed" does not represent the full extent of this phenomenon. Most counties followed the State Board instruction to, when VPAT records were lost or destroyed, print out the electronic audit log data and count the votes there by hand-to-eye. This procedure yielded a perfect reconciliation of the hand-to-eye and the electronic count and was used, for reporting purposes, by most counties. A report of the incidence of VPAT printer problems is being developed separately. In no case was a discrepancy attributed to an error in the electronic tabulation.
